

# Surprise! Surprise! Interactive Loss of Control (LOC) Outreach Seminar

Factors that contribute to Loss of Control accidents include; pilot proficiency, Aeronautical Decision Making (ADM), inadequate hazard identification and risk assessment, hazardous operational environments, and human factors. This presentation focuses on loss of control event precursors that pose no inordinate threat individually but, taken together, nearly cause a disaster.

**Directions:** Looking at the facility from Route 41 there are three entrances, take the far left entrance and there will be a pass card hanging on the gate box to get in with. The Experimental Aircraft Association (EAA) hanger is located straight ahead. For airport hanger location see attached Google map.

## A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
